EDUCATION

Shri Shankaracharya Technical Campus - Bhilai   June 2022
MCA (Master in Computer Application)   *Current GPA: 8.0/10*

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C/C++, SQL, HTML/CSS.
Frameworks/Libraries: React.js, NestJS, Node.js, Express.js, Redux, Next.js.
Tools and Technologies Postman, MongoDB, MySQL, PostgreSQL, Prisma ORM, RESTful APIs, GraphQL.
Core Subjects Object-Oriented Programming, Data Structures and Algorithms, DBMS, Operating Systems.

INTERNSHIP EXPERIENCE

Learning Spiral | *Technical Support Executive-Database*   Dec.2024– Present
- proficiency in SQL and MySQL, including writing and optimizing complex queries.
- Providing support for database-related issues. Troubleshooting and resolving performance issues.
- Managing user access and permissions. Creating technical documentation for recurring issues.
- Coordinating with cross-functional teams to address complex issues.

Curiosity Road(gospring.io) | *front-end web developer*   Feb. 2022 – May 2022
- Splitting Quiz "Curiosity Road" is a digital interactive story-telling platform for engaging individuals and groups. It is a SaaS−platform to create content for your consumers, employees, social communities, citizens, or students.
  Achievements/Tasks
- **Splitting Quiz :** A splitting quiz feature allows users to split the questions according to how many questions they wish to split into or according to their preferences using drag & drop functionality and it creates individual quizzes for that chunked set of questions.
- **Technologies Used:** HTML/CSS, JavaScript, Angular , Firebase

PROJECTS

E-commerce | *React.js , Firebase Database , react-router-dom , react-toastify , Redux-toolkit , CSS*   🔗 **link**
- Developed an E-commerce platform using React.js and Redux Toolkit for state management and persistence.
- Implemented Redux Thunks for asynchronous actions (Login/Signup, cart updates).
- Managed state transitions with extraReducers (Pending, Fulfilled, Rejected).
- Built a sidebar to filter products by price and category with simultaneous search functionality.
- Integrated Firebase for real-time data and user authentication.

Stock Trading Platform | *React.js, Node.js, Express.js, Mongoose, Chart.js*   🔗 **link**
- Developed a real-time stock trading dashboard with an interactive UI
- Integrated Chart.js to display dynamic stock market graphs (candlestick, line charts).
- Used Mongoose to store user data, watchlists, and trade history.
- Implemented RESTful APIs for fetching stock prices and managing transactions.

Chat App | *Node.js , Express.js , Socket.io , MongoDB*   🔗 **link**
- The aim of the Chat App project is to interactive real-time chat application, facilitating seamless communication to provide a robust and engaging chat experience
- These messages will be securely stored in the database for future reference and retrieval
- Typing indicator will be displayed to all connected users, indicating which user is currently typing.

CERTIFICATES

Python for Data Science (NPTEL Online Certification) 🔗   Jan. 2022 – Mar. 2022
Web-development from Internshala 🔗   Sept. 2021 – Nov. 2021
